Problem Set #4: Temporal Logic: LTL and CTL
James Pustejovsky

October 13, 2013

Posted: Sunday, October 13, 2013

Due Date: Sunday, October 20, 2013 at 11:00 pm

- (1) Express the following sentences in LTL:
 - (a) Every green light will be followed by a yellow light, which will be followed by a red light, which will be followed by a green light.
 - (b) Whenever the event ϕ occurs in the future, it will not hold at the next moment, but will occur again later in the future.
 - (c) A train may not enter the tunnel unless the light on the other end of the tunnel is red.
 - (d) A train may only enter the tunnel after the light on the other end of the tunnel has turned red.
 - (e) Whenever a train enters the tunnel, the light on the other end of the tunnel must be red and will stay red until the train has left the tunnel.
 - (f) The event ϕ may occur not more than twice in the future, at least two time units apart.
- (2) Huth and Ryan Problem 3.4 #8. (a)-(c) (page 249)
- (3) Huth and Ryan Problem 3.4 #9. (page 249)
- (4) Huth and Ryan Problem 3.4 #10. (a)-(e) (page 249)
